

BECOMING HAIR STUDIO - EXTENSION HOME CARE AGREEMENT

Congratulations on your decision to have 100% remy hair extension featuring a safe and advanced keratin bonding technology that doesn't damage your existing hair with any harsh chemicals dyes, glues, sewing or weaving. It's our great pleasure to create an exciting new look for you. Hair extensions are an amazing way to add volume, length, highlights, and new colour to your existing hair to give you a new beautiful hairstyle. We want you to have the best hair extension experience ever before. Please read the information below carefully for your home care. By following the instructions listed here, you will greatly enhance your experience with your 100% cuticle human hair extensions.

It is emphasized that you take special care of your Beautiful Extensions as followings.

- **Do not shampoo your new Extension for 2 days after installation**
- **Never Sleep on Wet Hair**, and make sure your hair is completely dried before going to bed. **Pull back your hair with a soft scrunches or braid** it to prevent the hair from getting tangled.
- **In the morning gently unravel the braid or the ponytail with your fingers.** Brush with a 100% boar bristle brush (or professional U-Loop Brush) from the nape up, row by row, and also brushing up from end to roots gently.
- Keep the hair **CLEAN**. We suggest that you wash the hair at least once or twice a week with warm water. When dirt accumulates, including sweat, hair tangles!!!
- It is very important to wash the hair in one direction, upright position.
- **NEVER dry with a scrubbing action, wrap with a towel** until water is absorbed and then use dryer at medium heat,
- **Don't comb the wet hair, use fingers going through the wet hair while blow-drying. Comb and style the hair after the hair is 100% dry.** holding the weft with the other hand to keep it from breaking down the hair and shedding
- When swimming in chlorinated water, always wear a cap to prevent the hair from chlorine, which may cause the hair to tangle. Also, when going to the spa, the hair should be brushed out completely and should be wrapped in a wet towel or in a braid. Do not use hot tubs or sauna's as this can break down the bonds and cause hair to dry and frizz.
- **Over exposure to chlorine, saltwater and sulfur, or hot weather** could break down the integrity of the bonds and led to pre-mature falling out or tangling, sometimes they might be affecting or changing your hair extension colours.
- It would be advisable **NOT TO TINT, COLOR, PERM** or any other extra process to the hair extensions because it is already processed hair at the Manufactures. If you have to do so, **please be extra careful especially with light colors.**
- You can use curling irons, electric rollers and blow dryers. Extension can be styled as your own hair. When using any type of appliance on your hair, use on **medium heat (300-350F) being careful never to place heat directly on the hair bonds, tape or metal beads.**
- **If you use heat protection serum to style your hair or use purple shampoo and conditioner, you might take your own risk of affecting the colour of the hair extensions since there might be chemical reaction.**

The Average time that your hair extensions can last is 4-8 months or even longer with proper care. The length of time that extensions last can be longer or shorter and will vary from person to person based on several factors including hair growth cycles, lifestyle and proper maintenance. Also, while you have extensions, loss of a few extension strands due to natural fallout is normal.

Application and removal of your hair extensions requires special training. As certified extensionists, we are comprehensively trained in all fact of application, removal and care of your hair extensions. Do not allow any stylist other than your certified extensionist to perform any service on your extensions (including perm, tint, bleach, haircut, removal, etc). You should also never perm, tint, or use any chemicals on your extensions yourself without consulting your certified extensionist first. Do not try to remove hair extensions yourself, as the keratin bond is a very strong bond that requires a special solution and technique to be removed safely without causing any damage.

I _____ hereby acknowledge that I have read this agreement entirely and fully understand and agree to all its content. Furthermore, **I understand and agree that there are absolutely no refunds of my deposit, or the cost of the Hair extensions, or any charges for the service of applying the hair extensions.** I further acknowledge and agree that I bear the sole responsibility for the care of my extensions after application, as outlined in this agreement and hereby waive any and all rights to hold the salon or the certified extensionist responsible for any and all loss of the hair extensions irrespective of cause.
